39-gene WGCNA intersection GO_BP emapplot
negative regulation of cell development
negative regulation of molecular function
positive regulation of extrinsic apoptotic signaling pathway
negative regulation of DNA-binding transcription factor activity
regulation of Notch signaling pathway
positive regulation of type II interferon production
humoral immune response mediated by circulating immunoglobulin
hematopoietic or lymphoid organ development
lymph node development
regulation of chronic inflammatory response
regulation of lipase activity
positive regulation of alpha-beta T cell proliferation
immunoglobulin mediated immune response
B cell mediated immunity
positive regulation of canonical NF-kappaB signal transduction
