46 Matrisome DEGs GO_BP barplot
regulation of hydrolase activity
negative regulation of molecular function
regulation of peptidase activity
negative regulation of cell development
negative regulation of neurogenesis
negative regulation of nervous system development
immunoglobulin mediated immune response
B cell mediated immunity
negative regulation of DNA-binding transcription factor activity
negative regulation of developmental growth
negative regulation of axonogenesis
humoral immune response mediated by circulating immunoglobulin
regulation of Notch signaling pathway
regulation of lipase activity
lymph node development
