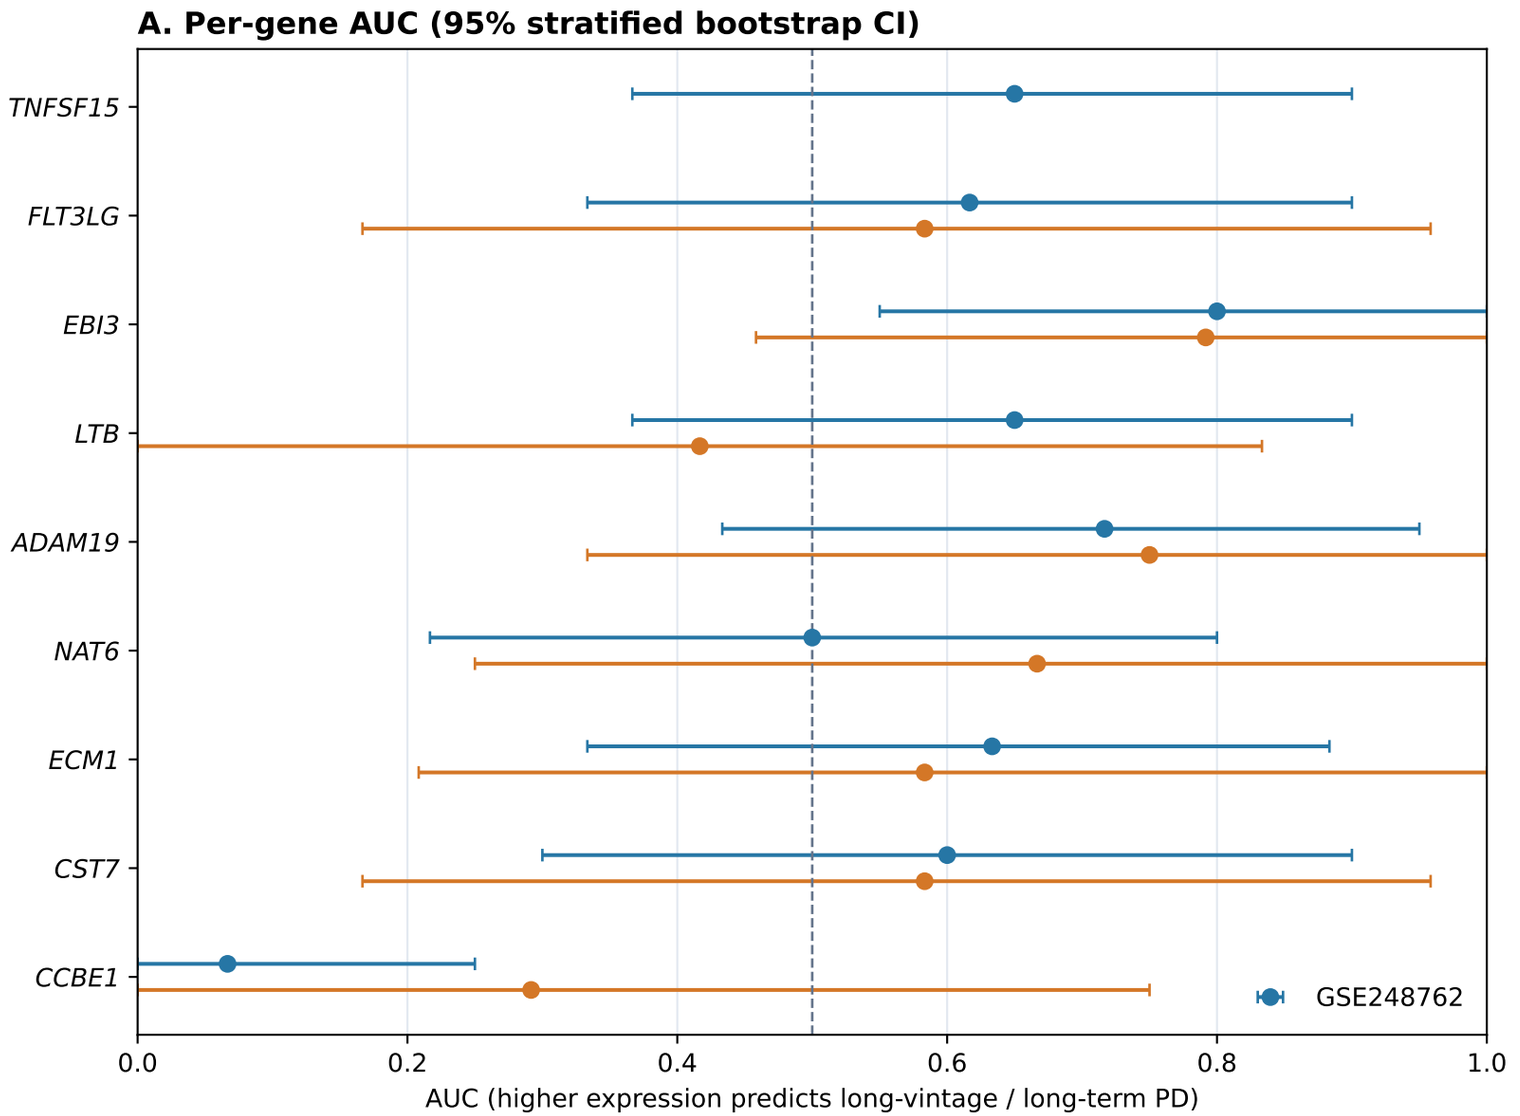
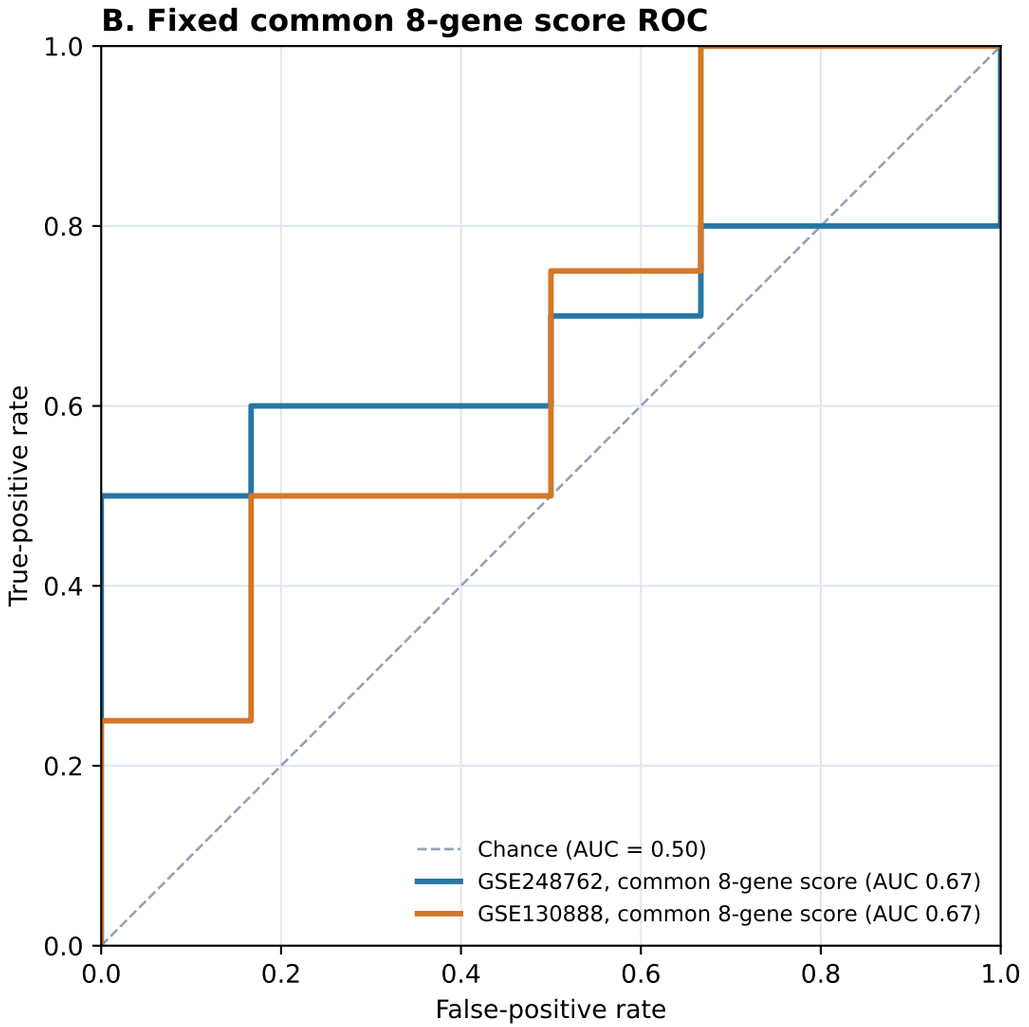
Exploratory ROC analysis of the nine consensus genes in effluent cohorts

GSE248762 (LV 10 vs SV 6) and GSE130888 (LV 4 vs SV 6); gene AUCs use higher expression as the LV score





Common score: equal-weight mean of within-cohort z-scores for FLT3LG, EBI3, LTB, ADAM19, NAT6/NAA80, ECM1, CST7 and CCBE1. TNFSF15 was unavailable in GSE130888. Exploratory; small cohorts and independence not formally confirmed.
