GO Biological Process enrichment
39 matrisome DEGs assigned to non-grey WGCNA modules; top 15 of 37 significant terms
regulation of multicellular organismal development
negative regulation of hydrolase activity
regulation of cell adhesion
negative regulation of peptidase activity
positive regulation of cell motility
regulation of hydrolase activity
positive regulation of locomotion
negative regulation of molecular function
regulation of cell motility
cell adhesion
regulation of peptidase activity
positive regulation of cell adhesion
locomotion
humoral immune response
regulation of locomotion
